To ensure continuous stability of the music signal, try to keep the BT and the mobile phone facing one another.
2. Music Playing: Press ●/▶, ◀◀ & ▶▶ Button to play music.
3. The BT of the unit can be used up to 10 meters if there are no barriers.

Battery Volume and Charging Indication

When charging, connect a matched power adapter to AC100V - AC240V. Charging time is approximately 3 to 5 hours. Once fully charged unplug the power supply as leaving a full battery on charge may cause damage to the battery.

Battery Charge Indicator: LED panel has battery status indicator. In the middle of the shape of the battery have four horizontal lines, each horizontal line represents 25% of electricity remaining. When

no horizontal line in the shape of the battery or the shape flashes, please power off and promptly charge to avoid damage to the battery. When charging, the battery indicator on LED display panel flashes. The indicator stops blinking after full charged. Then please continue to charge the battery for 1-2 hours to extend the battery life.

Warning: If the battery is under voltage, please fully charge it within 48 hours. If the speaker has to be left unused for a long time, please let the battery fully charged, otherwise it will cause damage to the battery!

In the process of playing, keep unit away from high temperature environments, high magnetic fields and high frequencies. If the system is fails to work, turn off the power source or pull out the USB disc/TF card, then reinsert it and it will resume play.

Remarks: Please charge the speaker when the unit is off or lower the volume to avoid sound distortion.

Warning

1. Do not use product in high temperature or wet environments. It will be damaged if getting wet.
2. Please do not open the speaker, as there is risk for electric shock or other accidents.
3. If it needs to be fixed, please contact the store where it is bought.
4. If any liquid comes into the speaker, please turn the power off right away. It has to be checked by certified staff.
5. When the device is not used, please turn the power off and pull out power plug.
6. Do not put anything on top of the speaker.
7. If the battery is incorrectly replaced an explosion could happen, so please replace it with the same type or equivalent type of battery.

Specification

Power Output	25W
Speaker Size	8"+3"
R. Frequency	120Hz-18KHz
S/N Ratio	≥ 78 dB
Power Input	AC100-240V
Dimension	280x305x485mm

Electric and electronic equipment and included batteries contains materials, components and substances that can be hazardous to your health and the environment, if the waste material (discarded electric and electronic equipment and batteries) is not handled correctly.

Electric and electronic equipment and batteries is marked with the crossed out trash can symbol, seen below. This symbol signifies that electric and electronic equipment and batteries should not be disposed of with other household waste, but should be disposed of separately.

As the end user it is important that you submit your used batteries to the appropriate and designated facility. In this manner you make sure that the batteries are recycled in accordance with legislature and will not harm the environment.

All cities have established collection points, where electric and electronic equipment and batteries can either be submitted free of charge at recycling stations and other collection sites, or be collected from the households. Additional information is available at the technical department of your city.
